IDENTIFIERS	*New England

ABSTRACT

Student enrollment in New England institutions of higher education for the fall 1972 are reported. Following introductory material, New England enrollment, first time students, residence data, institutional data, and U.S. enrollment are discussed. Appendices include statistical enrollment data for Vermont, New Hampshire, Maine, Rhode Island, Connecticut and Massachusetts and enrollment statistics by institutional control and level. (MJM)

APRIL 1973
NEW ENGLAND BOARD OF HIGHER EDUCATION

HIGHLIGHTS

* New England's degree granting institutions of higher education enrolled 597,208 students in Fall 1972, a 3.16% increase over the 578,905 enrolled in Fall 1971. Enrollment in the public sector increased 5.04% while that in the private increased 1.31%. These percent gains are all above the national gains between 1971 and 1972.

* For the first time in the region's history, enrollment in the public sector (302,007 or 50.6%) exceeded that in the private sector (295,201 or 49.4%).

* Overall, two-year colleges showed the greatest enrollment increase between Fall 1971 and 1972 (7.19%), four-year colleges the second largest (2.86%) and universities the least (1.85%).

* While public institutions at all levels continued to show gains (2-year, 9.50%; universities, 4.28%; 4-year, 2.73%), enrollment decreased in both private two-year colleges (-1.60%) and universities (-0.43%) with only the private four-year colleges showing a gain (2.94%).

* Analyses by level of student were again (as in Fall 1971) hampered by what appeared to be realignments in the categorization of these data for reporting to USOE.

* Massachusetts continued to enrol majority (53.7%) of the students atte a college or university in New Englan gether, Massachusetts and Connecticut for fully three-fourths of the region' dent population.

* Massachusetts showed the greates cal gain (8,815) in enrollment in the sector in the region, but Maine showe greatest percentage increase (7.36%). private sector, Vermont showed the gr percentage (13.80%) and numerical (1 gain. Overall, Vermont showed the gr percent gain (7.15%) while Massachuse the greatest numerical gain (9,776).

* Based upon data provided by inst enrolling 95 percent of the region's there were 131,651 first-time students England in Fall 1972. Of these, 118, enrolled for degree-credit and 12,826 non-degree students.

* Fall 1971 and 1972 first-time de enrollment data were available for 19 institutions which together accounted of the degree-credit enrollment in th in 1972. Based upon this sample, fir degree-credit enrollment dropped 1.19 tween 1971 and 1972 while total degre enrollment increased 3.11% and underg enrollment increased 4.28%. For deg students at public institutions only, time enrollment decreased by 3.79% wh

* Massachusetts continued to enroll the majority (53.7%) of the students attending a college or university in New England. Together, Massachusetts and Connecticut accounted for fully three-fourths of the region's student population.

* Massachusetts showed the greatest numerical gain (8,815) in enrollment in the public sector in the region, but Maine showed the greatest percentage increase (7.36%). In the private sector, Vermont showed the greatest percentage (13.80%) and numerical (1,410) gain. Overall, Vermont showed the greatest percent gain (7.15%) while Massachusetts showed the greatest numerical gain (9,776).

* Based upon data provided by institutions enrolling 95 percent of the region's students, there were 131,651 first-time students in New England in Fall 1972. Of these, 118,825 were enrolled for degree-credit and 12,826 were non-degree students.

* Fall 1971 and 1972 first-time degree-credit enrollment data were available for 190 institutions which together accounted for 89% of the degree-credit enrollment in the region in 1972. Based upon this sample, first-time degree-credit enrollment dropped 1.19% between 1971 and 1972 while total degree-credit enrollment increased 3.11% and undergraduate enrollment increased 4.28%. For degree-credit students at public institutions only, first-time enrollment decreased by 3.79% while the

total increased 6.08% and undergraduate increased 10.26%. For degree-credit students at private institutions, however, first-time enrollment increased by 2.03% while the total remained almost constant (+0.08%) and undergraduate decreased (-1.66%).

* Residence data were provided for 86.5% of the undergraduate students enrolled in New England's institutions of higher education in Fall 1972. In the public sector, 90.0% of these undergraduates were residents of the state in which the institution is located; in the private sector this figure was 46.6%.

* Residence data were also provided 80% of the region's first-professional students (100% of those attending publ institutions and 77% of those attendin vate institutions). Eighty-three perc of the first-professional students att public institutions were from in-state 45.9% of those attending private insti were from in-state.

* And residence data were provided 81.1% of the graduate students in the In the public sector, 68.9% of the gra students were from in-state; in the pr sector, this figure was 58.7%.

INTRODUCTION

The New England Board of Higher Education has been providing data on college and university enrollments in the region since 1957 as part of its now annual publication, *FACTS About New England Colleges, Universities, and Institutes*. In order to provide more up-to-date and more detailed information on the size of the higher educational enterprise in the region, however, NEBHE last year initiated an additional annual research report, *Student Enrollment in New England Institutions of Higher Education*. This report is the second in that series.

In order to ensure comparability with national figures and to avoid the needless duplication of questionnaires distributed to the region's colleges and universities, this report is based upon enrollment data provided routinely to the U.S. Office of Education as part of the Higher Education General Information Survey (HEGIS). In compiling this annual enrollment report, copies of the HEGIS form "Opening Fall Enrollment in Higher Education" are obtained for each institution in New England. When collected by USOE, as this year, copies of the HEGIS form "Residence and Migration of College Students" are also obtained.

Because the Connecticut Commission on Higher Education, the Massachusetts Board of Higher Education, and the New Hampshire Coordinating Board of Advanced Education and Accreditation

the Connecticut Commission
ucation, the Massachusetts
her Education, and the New
ordinating Board of Advanced
Education and Accreditation routinely receive copies of these and all HEGIS forms from the institutions in their respective states, these agencies have generously agreed to provide NEBHE with the appropriate forms as they receive them. (This further avoids the duplication of requests for information from institutions in these states.)

In the State of Maine, the Chancellor's Office provides the appropriate forms for the constituent units of the University of Maine system, and the remaining public and private institutions are contacted individually by NEBHE for copies of these forms. In Rhode Island and Vermont, NEBHE also contacts every institution directly in order to obtain the necessary data.

This year aggregate data are presented not only regarding enrollment by level of institution, by level of student and by residence of students, but also regarding the number of first-time students enrolled in the region -- with comparisons with Fall 1971 data, as available. In addition, these data are also presented by institution (Appendix A) in order that this report might be most useful to higher educational specialists in the region.

Because of the number of requests for information concerning enrollment in the Boston-area, NEBHE is this year instituting a brief supplementary report, *Student Enrollment in Institutions of Higher Education in the Boston SMSA*, which will also be prepared

annually henceforth. This new report is being mailed automatically to all institutions in the Boston Standard Metropolitan Statistical Area and is available on request to other interested parties.

The New England Board of Higher Education extends its thanks to all of those institutions and agencies without whose cooperation this report would not be possible.

DEFINITIONS

USOE definitions are employed throughout this report. These definitions are:

LEVEL OF INSTITUTION

2-Year College. Offering work extending at least 2 but less than 4 years beyond high school.

4-Year College. Offering work extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees. They may also offer organized occupational programs of less than 4 years.

Universities. Four-year colleges that give considerable stress to graduate instruction and have at least two professional schools that are not exclusively technological.

STUDENT CLASSIFICATIONS

Degree-Credit Students. Students are enrolled for work which is wholly or chiefly creditable towa a bachelor's or higher degree. T include the following five levels students.

Undergraduates. Students taking work creditable toward a bachelor degree and who have not yet attai a bachelor's degree.

First-Professional Students. Stu enrolled in a professional school program which requires at least t more academic years of college wo for entrance and a total of at le 6 years for a degree. Students i programs requiring only 4 or 5 ye beyond high school should be repo undergraduates. All students enr in work leading toward a master's degree are to be reported as *Grad*

Graduate Students. Students who the bachelor's or first-professio degree, or equivalent, and are ta work at the graduate level.

usively technological.

STUDENT CLASSIFICATIONS

Degree-Credit Students. Students who are enrolled for work which is wholly or chiefly creditable toward a bachelor's or higher degree. These include the following five levels of students.

Undergraduates. Students taking work creditable toward a bachelor's degree and who have not yet attained a bachelor's degree.

First-Professional Students. Students enrolled in a professional school or program which requires at least two or more academic years of college work for entrance and a total of at least 6 years for a degree. Students in programs requiring only 4 or 5 years beyond high school should be report as undergraduates. All students enrolled in work leading toward a master's degree are to be reported as *Graduate.*

Graduate Students. Students who hold the bachelor's or first-professional degree, or equivalent, and are taking work at the graduate level.

Extension Students. Extension students are not defined uniformly in all institutions. Most commonly it means face-to-face instruction in centers or places away from the main campus or branch campuses. It may also include on-campus instruction offered by an extension division. Extension centers differ from branch campuses in that students are not counted as resident students. Note that only degree-credit extension enrollment is requested. Enrollment in interest courses, short courses, and other community-type programs not creditable toward such an award are to be excluded even though they may be offered under the auspices of the extension division.

Unclassified Students. Not candidates for a degree, diploma, or certificate, or equivalent award, although taking courses in regular classes with other students; this category also includes students who cannot be classified by academic level, as well as students with the bachelor's degree who are taking undergraduate courses (e.g., for teacher certification).

Non-Bachelor's-Degree- Credit Students in Organized Occupational Programs of Less Than Four Years, not Chiefly Creditable Toward a Bachelor's Degree. Students in vocational and technical educational programs which are normally terminal and result in a certificate, diploma, or similar award. NOTE: These students are simply called *Non-Degree Students* in this report to distinguish them from *Degree-Credit Students.*

First-Time Non-Degree Students. Non-degree students who are entering an institution of higher education for the first time, and who have not previously attended any other institution of higher education. Exclude transfers.

RESIDENCE

As determined by the institution. *In-state* students are those whose "home state" is the one in which the institution is located. *Out-of-state* students are those whose "home state" is elsewhere in the United States and its territories. *Foreign Students* are those whose "home" is outside the United States and its territories.

NEW ENGLAND ENROLLMENT

Opening fall enrollment data for the academic year 1972-73 were obtained for 245 of the 250 degree-granting institutions of higher education in New England. A breakdown of these 245 institutions, by state and level of institution, is presented in Table 1.

Enrollment in New England's colleges, universities and institutes continued to increase in Fall 1972, with a new high point being reached -- 597,208, a 3.16% (18,303) increase over Fall 1971. Enrollment in the public sector increased 5.04% (14,477) between Fall 1971 and Fall 1972, compared to a 1.31% (3,826) increase in the private sector.

(Based upon preliminary data released by the U.S. Office of Education, enrollment growth in New England was, therefore, ahead of that for the nation. Between 1971 and 1972, enrollment at all institutions in the U.S. increased by only 2.0% compared to 3.16% in New England. For public institutions, the U.S. increase was 2.67% compared to 5.04% in this region; for private institutions, the U.S. total actually decreased 0.12% while the New England total increased 1.31%.*)

As predicted in last year's New enrollment report, total enrollment i public sector (302,077) surpassed tha the private sector (295,201) in Fall for the first time in the region's hi Thus public institutions accounted fo 50.6% of the region's students in Fal compared, for example, to 49.7% in 19 47.8% in 1970.

esearch Memo No. 1973-1, Research
National Education Association,
n, January 1972. The U.S. figures
in that *Memo* are reprinted in
3.

As predicted in last year's New England enrollment report, total enrollment in the public sector (302,077) surpassed that in the private sector (295,201) in Fall 1972 for the first time in the region's history. Thus public institutions accounted for 50.6% of the region's students in Fall 1972 compared, for example, to 49.7% in 1971 and 47.8% in 1970.

Level of Institution	1971	1972	Percent Difference
Public			
Universities	107,205	111,795	+4.28
4-Year Colleges	107,000	109,924	+2.73
2-Year Colleges	73,325	80,288	+9.50
Total Public	287,530	302,007	+5.04
Private			
Universities	115,048	114,559	-0.43
4-Year Colleges	157,052	161,676	+2.94
2-Year Colleges	19,275	18,966	-1.60
Total Private	291,375	295,201	+1.31
All Institutions			
Universities	222,253	226,354	+1.85
4-Year Colleges	264,052	271,600	+2.86
2-Year Colleges	92,600	99,254	+7.19
Total All Inst.	578,905	597,208	+3.16

BY LEVEL OF INSTITUTION

The two-year colleges in New England showed the greatest increase in enrollment between 1971 and 1972 (7.19%), as they did in the nation. While the public two-year colleges in the region increased their enrollment by 9.50%, however, the private two-year college enrollment dropped 1.60%.

Enrollment in the region's four-year colleges showed the next highest increase at 2.66%, with the private sector showing a slightly greater increase than the public (2.94% and 2.73% respectively).

And while enrollment at the region's universities increased 1.85%, the number of students attending public universities increased by 4.28% while the number attending private universities decreased by 0.43%.

Thus among public sector institutions, universities showed the second highest rate of increase, behind the two-year but ahead of the four-year colleges. In the private sector, however, only the four-year colleges showed overall enrollment growth, while both two-year colleges and universities showed a slight drop in enrollments.

BY LEVEL OF STUDENTS

If degree-credit and non-degree students are considered separately, it is seen that while the enrollment of the former increased 3.42% from 1971 to 1972 the latter decreased 1.54%. By control of institution, private institutions showed increases in both the number of degree-credit (1.10%) and non-degree (12.12%) students while the public institutions showed an increase among deg (5.94%) but a decrease among (-4.58%) students.

As in last year's repor ment in the reporting of dat dent when degree-credit enro by level of student. (It is realignments are in the dire senting a clearer picture of patterns in the region).

Type of Students	1971
Public	
Degree-Credit	262,697
Non-Degree	24,833
Total Public	287,530
Private	
Degree-Credit	285,650
Non-Degree	5,725
Total Private	291,375
All Institutions	
Degree-Credit	548,347
Non-Degree	30,558
Total All Inst.	578,905

Among all institutions, extension enrollment dropped while unclassified students 44.82% (10,139) and graduate by 13.61% (8,897). These sh

ivate institutions showed
th the number of degree-
and non-degree (12.12%)
the public institutions

showed an increase among degree-credit (5.94%) but a decrease among non-degree (-4.58%) students.

As in last year's report, some realignment in the reporting of data appears evident when degree-credit enrollment is analyzed by level of student. (It is hoped that such realignments are in the direction of presenting a clearer picture of actual enrollment patterns in the region).

Type of Students	1971	1972	Percent Difference
Public			
Degree-Credit	262,697	278,312	+5.94
Non-Degree	24,833	23,695	-4.58
Total Public	287,530	302,007	+5.04
Private			
Degree-Credit	285,650	288,782	+1.10
Non-Degree	5,725	6,419	+12.12
Total Private	291,375	295,201	+1.31
All Institutions			
Degree-Credit	548,347	567,094	+3.42
Non-Degree	30,558	30,114	-1.45
Total All Inst.	578,905	597,208	+3.16

Among all institutions, for example, extension enrollment dropped 36.90% (22,418) while unclassified students increased by 44.82% (10,139) and graduate students increased by 13.61% (8,897). These shifts are primarily

in the public institutions where extension enrollments dropped 40.61% (19,744) while unclassified and graduate increased by 84.74% (8,179) and 47.80% (9,226) respectively. Similar shifts, but of lesser magnitude, occurred in the private sector, except that graduate enrollment dropped slightly (-0.71% or 329).

Level of Students	1971	1972	Percent Difference
Public			
Undergraduate	183,808	201,628	+ 9.70
1st Professional	1,324	1,458	+10.12

	24,833	23,695	- 4.58
	287,530	302,007	+ 5.04
	205,674	207,027	+ 0.66
	8,781	11,603	+32.14
	46,086	45,757	- 0.71
	12,137	9,463	-22.03
	12,972	14,932	+15.11
	5,725	6,419	+12.12
	291,375	295,201	+ 1.31
	389,482	408,655	+ 4.92
	10,105	13,061	+29.25
	65,384	74,281	+13.61
	60,752	38,334	-36.90
	22,624	32,763	+44.82
	30,558	30,114	- 1.45
	678,905	597,208	+ 3.16

Undoubtedly some of these changes are the result of natural expansion and contraction at these student levels. Much,however, would again appear to be the result of redefinition of those students being classified as extension students.

Undergraduate enrollment increased at both public (9.70%) and private (0.66%) institutions, with an increase of 4.92% for all New England institutions. Similarly, first-professional enrollment in New England increased 29.25% with both sectors showing gains, although the private institutions in particular show a sizeable increase (32.14% compared to 10.12%).

BY STATE

As the cover shows, Massachusetts continued to enroll the majority of New England students (53.7%). (Massachusetts is also the only state in the region -- indeed, in the nation -- where enrollment in the private sector still exceeds that in the public. The percent of total enrollment in the private sector is gradually declining, however, standing at 58.13% in 1972 compared to 59.65% in 1971.)

Vermont showed the greatest percent increase in enrollment between 1971 and 1972 (7.15%) with Maine second (6.53%). The largest numerical gain was, however, in Massachusetts (9,776 or 3.14%).

In the public sector, Maine showed the greatest percent increase (7.36%) with Massachusetts close behind (7.02%). Again, Massachusetts showed the greatest numerical gain in the public sector (8,815).

In the private sector, Vermont showed both the greatest percent (13.80%) and numerical (1,410) gain over 1971. In Connecticut the private sector showed a slight decrease (-0.11%), the only decrease among either public or private institutions on a statewide basis.

By State	1971	1972	Percent Difference
Public

NEW ENGLAND FIRST-TIME ENROLLMENT

A total of 218 institutions provided information regarding the number of first-time degree-credit students enrolled in Fall 1972. These 218 reporting institutions together account for 95% (539,997) of the 567,095 degree-credit students in New England in 1972. They reported a total of 118,825 first-time degree-credit students. (See Table 12)

In addition, another 12,826 first-time non-degree students were reported by 46 institutions. Together these institutions account for 84% of the total non-degree enrollment in the region. (See Table 13.)

Thus, 131,651 first-time students were reported for New England for Fall 1972 by institutions which together account for 565,236 or 94.6% of the region's enrollment.

First-Time Enrollment	Public	Private	Total
Degree-Credit	62,088	56,737	118,825
Non-Degree	9,571	3,255	12,826
Total	71,659	59,992	131,651

Table 14 presents the total, undergraduate and first-time degree-credit enrollment for Fall 1971 and Fall 1972 for those 190 institutions providing first-time enrollment both those years. These 190 institutions account for 89 percent of the credit enrollment in the regio

First-time degree-credit this sample of institutions dr between 1971 and 1972 at the s total degree-credit enrollment and that undergraduate enrollm 4.28%.

Among the 69 public insti the necessary data, first-time enrollment decreased 3.79% whi credit enrollment increased 6. graduate enrollment increased the 121 private institutions i first-time degree-credit enrol by 2.03% while total degree-cr remained almost constant (0.08 graduate enrollment decreased

Since the percent variati degree-credit and undergraduat this sample of institutions do exactly with those for all New tutions (see previous section) in first-time enrollment canno to the entire region. More de tion on which institutions did provide first-time enrollment Appendix A.

utions which together
5,236 or 94.6% of the
lment.

Public	Private	Total
62,088	56,737	118,825
9,571	3,255	12,826
71,659	59,992	131,651

presents the total, under-
irst-time degree-credit enroll-
1971 and Fall 1972 for those
ns providing first-time enroll-
e years. These 190 institutions account for 89 percent of the total degree-credit enrollment in the region in Fall 1972.

First-time degree-credit enrollment at this sample of institutions dropped 1.19% between 1971 and 1972 at the same time that total degree-credit enrollment increased 3.11% and that undergraduate enrollment increased 4.28%.

Among the 69 public institutions supplying the necessary data, first-time degree-credit enrollment decreased 3.79% while total degree-credit enrollment increased 6.08% and undergraduate enrollment increased 10.26%. At the 121 private institutions included, first-time degree-credit enrollment increased by 2.03% while total degree-credit enrollment remained almost constant (0.08%) and undergraduate enrollment decreased 1.66%.

Since the percent variations in total degree-credit and undergraduate enrollments for this sample of institutions do not correspond exactly with those for all New England institutions (see previous section), these shifts in first-time enrollment cannot be generalized to the entire region. More detailed information on which institutions did and did not provide first-time enrollment data appears in Appendix A.

RESIDENCE OF STUDENTS ATTENDING COLLEGE IN NEW ENGLAND

Two hundred and twenty-nine institutions provided data on the "home state" or residence of their students in Fall 1972. These data are presented in aggregate form in Table 15 and by institution (for undergraduates only) in Appendix A.

Residence data were provided for 353,530 or 86.51% of all (408,655, see Table 7) undergraduates reported in the region. For public institutions only, residence data were provided for 184,475 (91.49%) of the undergraduates reported (201,628) for Fall 1972. For private institutions, residence data were provided for 169,055 (81.65%) of the undergraduates reported (207,027). (See Table 15. Appendix A also presents a more detailed look at which institutions did and did not provide undergraduate residence data.)

95.7	49.7
66.8	26.2
83.7	43.4
64.1	13.1
90.0	46.6

Based upon this sample of institutions, 90.0% of the undergraduates attending a public institution in Fall 1972 were residents of the state in which the institution is located. In the private sector, 46.6% of the undergraduates were residents of the state in which the institutions is located. Obviously these percents vary greatly by state, as illustrated in the above table.

Residence data were provided for 10,443 or 79.96% of all (13,061, see Table 8) first-professional students reported in the region. For public institutions, these data were provided for all first-professional students reported (1,458). For the private institutions, these data were provided for 8,986 (77.45%) of the first-professional students reported (11,603).

Percent First-Professional Students From In-State

New Hampshire	---	6.2
Rhode Island	---	---
Vermont	41.1	---
New England	83.0	45.9

* Sample too small to be meaningful.

Of all first-professional students attending a public institution in New England, 83.0% were residents of the state in which the institution is located. Based upon those private institutions responding, 45.9% of such students enrolled in the private sector were residents of the state in which the school is located.

At the graduate level, residence data were provided for 60,217 or 81.06% of all (74,281, see Table 9) such students reported in the region. For public institutions only, residence data were provided for 23,219 (81.40%) of the graduate students reported (28,524) for Fall 1972. For private institutions, such data were reported for 36,998 (80.86%) of the graduate students reported (45,757).

SOURCE: U.S. Office of Education, National Center for Educational Statistics, Pre-publication Release, preliminary data, December 1972.

[a]Totals in this table have not been rounded but are given as they were obtained by simple addition of the figures for individual institutions. The presentation in no way implies that totals and subtotals are accurate to the last few digits.

[b]Year-to-year comparisons by type of institution must always be made with caution because of type classifications of institutions; in 1972 the reorganization and reclassification of Wisconsin institutions, and the new independence and reclassification of George Mason University in Virginia, have reduced the national total of university enrollment by approximately 40,000 and increased the total enrollment of other four-year institutions by the same amount.
